amey

## NOW AVAILABLE

# NEW ONLINE TRAINING

## through LearnUpon

**Amey has recently completed an exciting project which has integrated access to online driver training through our partner, Applied Driving Techniques (ADT) with our internal LearnUpon system.**

ADT's library of online modules numbers over 25 and growing. This may be of interest to your wider teams to promote awareness and support with any gaps in knowledge. A sample of some of the content available includes:

- Distracted Driving
- Speed Awareness
- Fatigue
- Low speed manoevring
- and many more….

For employees with a registered Amey email address, all courses will be enrolled through LearnUpon and count towards your annual learning results. Any employee, contractor or agency staff who do not have access, can still access the training, provided they are registered on ADT's system for driver licence checks.

ADT will automatically be issuing training to applicable drivers based on outputs from licence endorsements, incident and telematics data.

Training in partnership with

**Applied** driving techniques

For further details on how you can access this training for you and your wider team, please contact **compliance@amey.co.uk**
